

### Macro and Sectoral Developments

- The Reserve Bank of India (RBI) significantly increased its gold reserves by 57.49 tonnes in FY25, more than doubling the 27.46 tonnes added in FY24. This move has raised the RBI's total gold holdings to 879.59 tonnes as of the end of FY25. The central bank's gold accumulation comes amid escalating geopolitical tensions and financial market volatility. [\(Source: ET\)](#). **Impact: Neutral.**
- Consumers may soon find premium cars more affordable. The India-UK FTA is set to lower import duties on high-end vehicles. This could bring down prices significantly. Auto parts makers in India are also expected to gain. They will likely see increased exports to the UK. The agreement promises enhanced cooperation and market access for the automotive industry. [\(Source: ET\)](#). **Impact: Neutral.**
- The cost of a home-cooked thali in India dropped by 4.0% in April, driven primarily by a decline in vegetable prices. The cost reduction was also supported by stable grain prices, making staple meals more affordable for households. The trend reflects improved crop yields and favorable supply conditions, potentially easing inflationary pressures in the coming months. [\(Source: ET\)](#). **Impact: Neutral.**
- India's exports to the United States hit a record USD 11.2 Bn in March, crossing the USD 10 Bn mark for the first time and reflecting a nearly 50.0% increase over the 12-month average, according to the United States Census Bureau. Total bilateral trade for the month reached USD 15 Bn, supported by a 90-day tariff pause. In Q1 2025, India's exports to the US totaled USD 27.7 Bn, while imports stood at USD 10.5 Bn, resulting in a USD 17.2 Bn US trade deficit. [\(Source: BS\)](#). **Impact: Neutral.**
